Education

Master of Science in Computer Science — Jan 2026 – June 2028 (Expected)
Georgia Institute of Technology — *GPA: 3.5*

Bachelor of Science in Computer Science — Aug 2022 – Aug 2025
Kennesaw State University — *GPA: 3.8*

Relevant Courses: Object-Oriented Programming, Computer Systems, Algorithms, Data Structures, Artificial Intelligence, Software Testing, Computer Graphics

Experience

Software Engineering Intern | ***Angular, Java, Spring Boot*** — May 2025 – May 2026
Union Pacific Railroad — *Omaha, NE*

- Built and migrated critical web applications to **Angular** with responsive design, enabling **8K+ field users** to complete operations on mobile devices and supporting **1.5 million** monthly requests
- Packaged and deployed the application as an Android app for Zebra handheld devices used by field crews
- Improved response times by **35%** by developing a RESTful ESB2 API-driven **microservice** with **Swagger** bindings in **Java Spring Boot**, integrating 5 services and **OracleDB queries** across 3 business units
- Deployed services through Jenkins CI/CD pipelines across dev, QA, and production environments
- Facilitated Agile 2-week sprints using **Jira**, leading standups and tracking releases

Research Assistant — Jan 2025 – May 2025
Kennesaw State University — *Kennesaw, GA*

- Evaluated AI chatbots used in therapy, examining their interactions and performance with real patients
- Analyzed **45+** research papers on AI in mental health, identifying key ethical concerns and research trends
- Presented research findings to faculty and students at the Symposium of Student Scholars

Technical Projects

CardSync | ***Java, Spring Boot, React, TypeScript, PostgreSQL, Plaid API, Docker***

- Developed a finance platform aggregating multiple transactions via **Plaid API** with rules-based transaction categorization
- Implemented secure authentication and data protection using JWT, Spring Security, BCrypt, and encrypted Plaid tokens stored in **PostgreSQL**
- Designed RESTful APIs and wrote JUnit 5 and Mockito tests to catch regressions

AI Genie Chatbot | ***Angular, Node.js, PostgreSQL, OpenAI API, Web Scraping***

- Built an AI-powered chatbot for technical support and CRM ticketing, reducing ticket handling time by 60%
- Developed a custom **CMS** and **Web scraping** pipeline to automate updates to a **200+** entry FAQ knowledge base
- Deployed and validated chatbot functionality through iterative testing and stakeholder feedback

Power Grid Simulator | ***React, Java, Spring Boot, REST APIs***

- Created a grid simulator modeling substations and transmission lines, with React dashboards visualizing real time load
- Implemented BFS graph traversal to propagate cascading outages across connected facilities, identifying affected nodes for maintenance

Technical Skills

Languages: Java, Python, JavaScript, TypeScript, SQL, HTML/CSS
Frameworks & Libraries: Angular, React, Spring Boot, Node.js
Technologies: Docker, Postman, Maven, Gradle, Jira, Jenkins, CI/CD, Git, Linux, GitHub Copilot, Claude Code
Databases: OracleDB, MySQL, PostgreSQL, MongoDB
Testing: JUnit, Mockito
